Authorization for this examiner's amendment was given in a telephone interview with Christopher Cronin on 2/5/08.

The application has been amended as follows:

**In the claims:**

Delete claims 61 and 62.

The following is an examiner's statement of reasons for allowance: The use of nitrous oxide or xenon in the treatment of stroke is contraindicated by the art. Tonner et al. (Best Practice & Research Clinical Anaesthesiology 2001, 15(3) 491-503) teach that xenon and nitrous oxide are known to increase cerebral perfusion which then results in increased intracranial pressure. For that reason the use of such agents is contraindicated in patients with elevated intracranial pressure because their use may lead to increases in cell damage and cellular death (page 496, Effect on Cerebral Circulation). Indeed, Kotwica et al. (Res. Exp. Med 1991, 191, 99-104) teach that

ischemic stroke remains the third largest cause of death and that death is most commonly due to increased intracranial pressure (Abstract and page 99, introduction). In contrast to these teachings, Applicant has clearly demonstrated a neuroprotective effect with nitrous oxide and xenon *and not* increased cellular damage with respect to cerebral ischemia (See Figures 3 and 4, for example). Therefore, the Examiner can only conclude that one of ordinary skill in the art of ischemic brain events would not look to therapeutic agents known to elevate intracranial pressure for treating post-ischemic patients.

***Allowable Subject Matter***

Claims 42, 44-48, 52-56 and 58-60 [renumbered as 1-14] are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
